

ABSTRACT OF THE DISCLOSURE

A bottom structure of a biaxially-oriented blow-molded bottle-shaped container is made of a synthetic resin, and includes ~~comprising~~ a neck, a shoulder, a body and a bottom, ~~characterized in that~~ The bottom has a connecting cylindrical wall, a tapered-cylindrical wall, a bottom wall and a grounding wall, ~~said connecting cylindrical wall connects to a lower end of the body, said tapered cylindrical wall connects to a lower end of the connecting cylindrical wall,~~ a diameter of ~~said the~~ tapered-cylindrical wall is decreased downwardly at a certain inclined angle, ~~said The~~ bottom wall is domed to an inside of the container, ~~said~~ The grounding wall is ~~formed~~ in a ring plate shape, and ~~is~~ arranged between a lower edge of the tapered-cylindrical wall and a lower edge of the bottom wall, ~~each~~ Each of a plurality of groove ribs is formed from an upper edge of the tapered-cylindrical wall through the grounding wall to the lower edge of the bottom wall, ~~and the~~ The groove ribs are arranged with isometric center angle, and extend radially.
